

Shary & Co — Azerbaijan Dual-Degree MBBS Campaign Roadmap

Goal: 50 paid deposits | Window: 16 Jun → 30 Aug 2026 (~10.5 weeks) | Classes: 15 Sep

0. Read this first — the honest version

Your instinct (high-volume content → WhatsApp → explainer video → call → close) is **the right shape**. But two things will make or break the 50-client goal, and your current plan is missing both:

- 1. Organic alone cannot hit 50 in 10 weeks.** You have 682 followers. Even with great reels, organic reach is slow to compound and won't deliver the *volume* of qualified buyers you need before 30 Aug. **You must run paid ads** (Meta + a little YouTube) to your best content, targeting Pakistani expats in the GCC. Organic builds *trust and proof*; paid builds *volume and speed*. You need both.
- 2. You must qualify leads BEFORE the sales call**, or you'll waste your closing time on people who can't pay \$10k. Add a 3-question filter (budget / eligibility / timeline) between WhatsApp and the booked call.

Everything below is built around those two corrections plus your original funnel.

The funnel math (this is the whole campaign in one table)

Work backwards from 50. These are realistic high-ticket education ranges — adjust as your real numbers come in.

Stage	Conversion	Needed to hit 50
Closed deposits	—	50
Qualified sales calls / webinar attendees	~20% close	~250
Booked calls	~55% show-up	~450
Qualified WhatsApp leads	~30% book	~1,500
Total WhatsApp leads (raw)	~70% pass qualifier	~2,150
Content/ad reach → WhatsApp click	varies	paid + organic

Translation: you need roughly **5 deposits per week** and a steady **~200 WhatsApp leads per week**. That is achievable, but only with paid amplification. If your real close rate is higher (warm, referred, parent-backed leads often close at 30–40%), you need fewer calls — track and recalibrate weekly.

Biggest lever: close rate on the call. Going from 20% → 30% cuts the leads you need by a third. Invest in the **sales process and proof**, not just more reels.

1. The improved funnel (your plan + the upgrades)

What I added to your original idea and why

- **Qualifier step** — protects your calendar. \$10k/yr means parents usually pay; ask early "who's funding this?" and confirm FSc/A-Level/Class-12 eligibility.
- **Weekly group webinar** ("Free Masterclass: How Pakistani families get a globally-recognised MBBS in Azerbaijan for \$10k/year") — this is the single biggest scaler. One event closes 10–30 fence-sitters at once, manufactures urgency, and stacks social proof (other parents asking questions). Run it **every Saturday**.
- **Parent track** — Pakistani study-abroad decisions are family decisions. Some content, the PDF, and at least part of every call must speak to parents (safety, recognition, return-to-Pakistan licensing).
- **Lead magnet** — the PDF fee breakdown + a "PMDC recognition proof" sheet given inside WhatsApp. Gives value, filters tyre-kickers, and pre-handles the #1 objection (scam fear).

2. Channel strategy

Organic (trust + proof engine) — keep doing reaction/informative, add proof

- **Instagram Reels** = primary. You already have the format and the face. Double down.
- **YouTube Shorts + long-form** = repost every reel as a Short; publish 1 long-form/week (full campus tour, full student interview, full fee breakdown). YouTube ranks for "MBBS in Azerbaijan" searches for *years* — this is your evergreen asset.
- **TikTok** = repost reels (huge Pakistani-expat audience in GCC, cheap reach).
- **Facebook** = you have a page; Pakistani parents live on Facebook. Repost everything + join/seed "Pakistanis in Dubai/Qatar/Saudi" groups (within group rules).

Paid (volume + speed engine) — non-negotiable for hitting 50

- **Meta Ads (IG + FB), objective = WhatsApp messages / click-to-WhatsApp**. This is your workhorse.
 - **Audiences:** (a) Pakistani expats in UAE, Saudi, Qatar, Kuwait, Bahrain, Oman aged 17–24 + parents 40–55; (b) global Pakistani diaspora interested in study-abroad/medicine; (c) Pakistan domestic (Lahore/Karachi/Islamabad) as a cheaper secondary.

- **Creative:** your best-performing organic reels become ads. Don't make ad-only creative first — promote what already proves out.
- **Retargeting:** anyone who watched 50%+ of a reel, visited profile, or messaged but didn't book → retarget with testimonial + deadline creative.
- **YouTube ads (optional, week 4+):** in-stream/Shorts ads targeting "study MBBS abroad" viewers.

Estimated budget (adjust to cash flow)

Tier	Ad spend over 10 wks	Expected raw leads*	Notes
Lean	\$2,000–3,000	~1,000–1,500	Tight; lean hard on webinar + referrals to make up close rate
Recommended	\$4,000–6,000	~2,000–3,000	Comfortable path to 50
Aggressive	\$8,000+	3,500+	Buffer for high CPLs / scaling winners

*Assumes ~\$2–3 cost per WhatsApp lead, typical for this segment. **Your first week is a test** — find CPL, then scale winners. With 50 clients × \$10k/yr, even \$8k ad spend is a tiny fraction of revenue; don't under-invest here.

3. Week-by-week roadmap (16 Jun → 30 Aug)

Week	Dates	Focus	Key actions
0 — Setup	16–22 Jun	Build the machine	WhatsApp Business + auto-flow & 90-sec video; booking calendar; qualifier; lead magnet PDF; set up Meta Ads + pixel; nail the offer & deposit terms; batch-film 2 weeks of content; finalise webinar deck
1	23–29 Jun	Launch + test	Go live: 1 reel/day + ads (\$30–50/day test across 3 audiences). First Sat webinar. Find your CPL & best hooks
2	30 Jun–6 Jul	Optimise	Kill losing ads, scale winners (2–3×). Push testimonials. Webinar #2
3	7–13 Jul	Scale proof	More student/parent testimonials + campus footage. Start retargeting. Webinar #3
4	14–20 Jul	Add YouTube	Launch long-form + YT ads. Introduce gentle urgency ("6 weeks to deadline"). Webinar #4
5	21–27 Jul	Mid-push	Halfway review vs 50. Double down on what closes. Webinar #5
6	28 Jul–3 Aug	Urgency ramps	"1 month left." Limited-seat messaging (only if true). Webinar #6
7	4–10 Aug	Objection blitz	Content series answering every objection (scam/PMDC/safety/cost). Webinar #7
8	11–17 Aug	Hard deadline push	"2 weeks left." Daily countdown. Bonus/fast-action incentive. Webinar #8
9	18–24 Aug	Final close	"Last week to apply." Personal follow-up to every warm lead. Extra webinars
10	25–30 Aug	Close out	Daily countdown, scarcity is now real. Sales team works the pipeline 1:1. Deposits close 30 Aug

Track weekly: deposits to date vs the 5/week pace line. If you're behind by week 4, the fix is almost always (a) more ad spend on winners, or (b) better call/webinar close rate — not more random reels.

4. Content engine

Posting cadence

- **Minimum: 1 reel/day** (7/week). Ideal: **2/day** (one informative + one reaction/proof). You already produce at this level — keep the volume.
- Every reel → reposted to YT Shorts, TikTok, FB.
- **1 long-form YouTube/week. 3–5 stories/day** (behind-scenes, polls, countdown, testimonials, "ask me anything").
- **Always end with one CTA:** "DM/WhatsApp the word **BAKU** to get the full fee breakdown + see if you qualify."

The 5 content pillars (rotate them)

1. **Informative / Authority** — explain the program, fees, recognition, process.
2. **Reaction / Edutainment** — your strength. React to myths, other consultants, fake offers, news.
3. **Proof / Social proof** — testimonials, student spotlights, campus & life footage, "100+ admissions."
4. **Objection-handling** — scam fear, PMDC, safety, cost, "is it worth it."
5. **Urgency / Offer** — deadline countdown, seats, deposit, what-happens-if-you-miss-it.

50 content topics with hooks (hooks matter more than the topic)

Informative / Authority

1. "MBBS for \$10,000 a year — and it's globally recognised. Here's the catch (there isn't one)."
2. "Normal MBBS vs Dual Degree MBBS+MPH — why the second one makes you unstoppable." (*you already have this — make it a series*)
3. "The REAL cost of studying medicine in Azerbaijan — full breakdown, no hidden charges." (*screen-share the fee table*)
4. "5 steps from applying to sitting in a Baku classroom." (*the admission process visualised*)
5. "Why there's NO entry test and NO foundation year for this program."
6. "What is an MPH and why does having one make you a better-paid doctor?"
7. "FSc, A-Levels, or American diploma — here's exactly what you need to qualify."
8. "What \$250/month actually buys you in Baku." (*grocery run / rent walkthrough*)
9. "Your degree is recognised by WHO, WFME, PMDC and lets you sit USMLE — here's proof." (*show the directories*)
10. "Timeline: apply today → classes 15 September. Here's how that's possible."

Reaction / Edutainment (*your superpower — lean in*) 11. React to a "study MBBS abroad for 5 lakh" scam ad — "Let me show you why this is fake." 12. React to comments: "You're lying, no MBBS is this cheap." — then prove it. 13. "Consultants react: things other agencies WON'T tell you about studying abroad." 14. React to a parent's WhatsApp voice note worried about safety in Azerbaijan. 15. "Rating study-abroad destinations for Pakistani students" — and why Azerbaijan wins. 16. React to "MBBS in China/Russia/Kyrgyzstan vs Azerbaijan" debate. 17. "Things I wish I knew before becoming a consultant" / "I wasn't planning on creating content until..." (*you already started this — continue it*) 18. React to a fake acceptance letter — "How to spot a scam university offer." 19. "Replying to your most-asked DM this week." 20. React to a student's first-day-in-Baku video.

Proof / Social proof 21. Full student testimonial: "Why I chose Azerbaijan over a Pakistani private college." 22. Parent testimonial: "I was scared to send my son abroad. Here's how it actually went." 23. "Student spotlight: Muhammad Mohsin, Class of 2027." (*you already do these*) 24. Campus tour with a current student. 25. "A day in the life of a Pakistani MBBS student in Baku." 26. Hostel/housing walkthrough — "This is where you'll actually live." 27. "100+ successful admissions — here are some of their stories." (*montage*) 28. WhatsApp screenshots of happy students/parents (with permission). 29. "Meet the students flying out this September." (*airport / send-off content*) 30. University medical facilities & hospital tour ("Medical University Ambulances" — extend it).

Objection-handling (*make a dedicated series — this is where deposits get unstuck*) 31. "Is this a scam? Here's how to verify EVERYTHING I'm telling you yourself." 32. "Will PMDC recognise my degree when I come back to Pakistan?" (*show the recognition status — be accurate*) 33. "Can I do USMLE / practice in the US or UK after this?" 34. "Is Azerbaijan safe for Pakistani Muslim students?" (*halal food, mosques, culture*) 35. "What if I fail / want to transfer? Here's what actually happens." 36. "Why is it cheaper than Pakistani private medical colleges?" 37. "Do I need to know Russian or Azerbaijani?" (*language of instruction*) 38. "What's included in the fee vs what's not." (*transparency builds trust*) 39. "Common myths about studying MBBS abroad — debunked." 40. "What happens to your money — how payments and deposits actually work." (*builds trust to pay*)

Urgency / Offer 41. "Admissions close 30 August. Here's the timeline if you start today vs next week." 42. "Why visa processing means you CAN'T wait until August to decide." 43. "Seats for the September intake are filling — here's where we're at." (*only if true*) 44. "What you lose by waiting one more year." (*opportunity cost*) 45. "Fast-action bonus: apply before [date] and get [free service]." (*if you offer one*) 46. Countdown series: "X weeks left to join the September intake." 47. "We just closed [N] admissions this week — September intake update." 48. "The last flight to Baku before classes is [date]. Work backwards from there." 49. "Free Masterclass this Saturday — exactly how to get in for \$10k/yr. Link in bio." 50. "DM **BAKU** — I'll personally check if you qualify and send the full breakdown."

Production system (so volume is sustainable)

- **Batch-film once a week**, 8–12 reels in one sitting (same shirt isn't a problem; vary it). Script the **hook (first 2 seconds)** for every single one — that's 80% of performance.
- Keep a **swipe file** of comments/DMs → each good question becomes a reaction reel.
- Reuse: every long-form YouTube video = 5–8 reels.
- **Always-on CTA + pinned comment** with the WhatsApp link.

5. WhatsApp auto-flow (the heart of the funnel)

Use **WhatsApp Business** (free) for now; upgrade to the **WhatsApp Business API** (via a provider like Wati, Interakt, or 360dialog) once volume justifies real automation and a team inbox.

The flow when someone messages (or sends "BAKU"):

1. **Instant welcome + the 90-sec video.** "Welcome to Shary & Co 🇦🇿 Here's a 90-second video on the Azerbaijan Dual-Degree MBBS and exactly how it works." (your explainer video — university, offer, recognition, price, deadline, one CTA).
2. **Qualifier (3 quick questions):**
 - "Which qualification do you have — FSc / A-Levels / Class 12 / American diploma?"
 - "Who's funding the studies — yourself or family?" (*softly confirms ~\$10k/yr is realistic*)
 - "When do you want to start — this September or a future intake?"
3. **Deliver the lead magnet:** the program PDF + fee breakdown + a short "how to verify our accreditation yourself" note. (Value + kills scam fear.)
4. **Book:** "Want me to check your eligibility personally? Pick a time → [booking link]" OR "Join our free Masterclass this Saturday → [link]."
5. **No-show / no-book follow-up sequence** (Day 0, 1, 3, 7): testimonial → objection-buster → deadline → final nudge. **Most deposits come from follow-up, not first contact.**

Keep raw leads and qualified leads in a simple **CRM or even a Google Sheet / pipeline board** (columns: New → Qualified → Booked → Showed → Closed → Lost). You cannot hit 50 by memory.

6. Sales: offer, calls, webinar, deposit

The offer (make it a clear package, not "come study abroad")

Frame it as: **"Globally-recognised Dual-Degree MBBS+MPH, \$10k/year, done-for-you admission + visa + housing, classes 15 September — and we guide you through all 5 steps."** Bundle your service so the deposit buys *certainty*, not just a seat.

Deposit mechanics (you didn't specify — recommendation)

- Take a **seat-reservation / processing deposit** (e.g. a fixed registration fee) to lock the September seat and start documents. Make the **terms crystal clear in writing** (what it covers, refund policy). Clarity here directly lifts close rate — people pay when they're not scared of the money disappearing.
- Then the admission steps: documents → acceptance letter → tuition → visa & tickets.

1:1 call structure (15–25 min)

- Rapport + "what made you reach out?"
- Their goal & situation.
- Confirm eligibility + funding.
- Present the fit (use their answers).
- Handle objections (scam/PMDC/safety/timeline).
- Ask for the deposit + give a reason to act now** (deadline, visa time, seats).

Weekly webinar structure (45–60 min) — your scaling weapon

Story/credibility → the opportunity (why Azerbaijan, why now) → the program & proof (recognition, testimonials) → the 5-step process → cost breakdown → Q&A → **clear CTA + deadline + how to pay the deposit tonight**. Have your team DM every attendee right after.

Top objections → pre-loaded answers

- "Is it a scam?"** → "Verify it yourself: here's the WDOMS/PMDC listing + talk to current students." (Proof, not promises.)
- "Will PMDC recognise it?"** → Show the *current* recognition status accurately (see compliance note below).
- "Is it safe?"** → Muslim-majority country, halal food, mosques, current-student footage.
- "Too expensive / can we pay in stages?"** → Compare to Pakistani private college total cost; explain the payment timeline.
- "Let me think / ask my family."** → Invite the parents onto the next call/webinar directly.

7. KPIs — track these weekly (build a one-tab dashboard)

Metric	Target
Reels posted	≥ 7/week
Ad spend & CPL (cost per WhatsApp lead)	CPL < \$3
Raw WhatsApp leads	~200/week
Qualified leads	~140/week
Calls booked / showed	~45 booked, ~25 showed/week
Webinar registrations / attendees	grow weekly
Close rate	≥ 20% (push to 30%)
Deposits this week / cumulative	5/week, on pace to 50
Cost per acquired student	track vs \$10k revenue (should be tiny)

If cumulative deposits fall behind the pace line: **first** raise spend on winning ads, **second** fix the close rate (more proof, better follow-up, get parents on calls) — *not* "post more random content."

8. Risks & compliance (read this — it protects the whole campaign)

- **Accreditation claims must be exact.** PMDC/HEC recognition of *specific* foreign medical universities changes over time and is the #1 thing serious Pakistani families (and regulators) check. **Verify the university's current PMDC/HEC recognised status before you advertise it**, and only claim what you can prove. Overclaiming → refunds, disputes, reputation damage, and students who can't sit the Pakistani licensing exam after 6 years. Show official listings, don't just assert them.
 - **Deposit terms in writing** — refund policy, what it covers. Reduces disputes and *increases* conversions (people pay when it's clear).
 - **Ad policy:** Meta restricts some education/financial claims; avoid "guaranteed" language. Keep testimonials truthful and permissioned.
 - **Data:** you're collecting names/numbers — handle the lead list responsibly.
 - **Capacity check:** can your team actually *service* 50 admissions (documents, visas, housing) by 15 Sep? Closing 50 you can't deliver is worse than closing 35 well. Make sure operations scale with sales.
-

9. Your first 7 days (do these now)

1. Write & record the **90-second WhatsApp explainer video** (university + offer + recognition + price + deadline + one CTA).
 2. Set up **WhatsApp Business auto-reply** with video → qualifier → PDF → booking link.
 3. Set up the **booking calendar** + the **Saturday webinar** (deck + registration link).
 4. Turn the PDF into a clean **lead-magnet** (fee breakdown + accreditation proof sheet).
 5. Set up **Meta Ads** (pixel, click-to-WhatsApp, 3 test audiences, \$30–50/day).
 6. **Batch-film 10–14 reels** from the topic list (script every hook).
 7. Build the **pipeline sheet/CRM** and verify the **PMDC recognition status** in writing.
-

Built from: Shary & Co program PDF (Dual Degree MBBS+MPH, Azerbaijan) and @shary_and_co Instagram. Numbers in the funnel table are industry estimates — replace them with your real conversion data after week 1 and recalculate.
